

Sales Lead Capture Tools & Recruiter Tools! For GoldMine

The quickest way to capture leads from web forms into GoldMine!

Web Response Grabber imports customer responses from web forms into GoldMine! The software runs on a PC and processes customer responses that are sent via email when customers fill Web forms -- without the hassle of programming or scripting!

Here is how easy it is to import web leads into GoldMine:

Step-1 Design a template to show how it should handle the email response (web form) – Here you would simply point and click which customer response in the email needs to be mapped to which GoldMine field. This needs to be done only once.

Step-2 Highlight emails that need to be processed and click on "GO" button. A GoldMine record is created for each response and data is imported into it.

- Ideal for capturing & processing e-mails from customer response forms, registration forms, questionnaires, surveys etc
- Eliminates time consuming data entry of internet sales leads - This is where mistakes are made
- Works with all popular email applications (GoldMine Email Center, Eudora, MS Outlook, Outlook Express, Netscape, ...)
- As secure as your email – Take charge of your leads – Don't let someone else handle them!
- Checks for duplicates and updates existing contact records

The quickest way to capture resumes into GoldMine!

ResumeGrabber automatically extracts contact information from Resumes and other documents and creates a GoldMine record. It also saves the resume, links it to the GoldMine contact as well as pastes the resume into the contact's notes. Currently deployed in hundreds of recruiting companies to improve productivity.

Here is how easy it is to enter a resume:

1. Highlight contact information on the resume and click on GO – and you are done!
2. ResumeGrabber
 - Creates a new GoldMine® contact with all details
 - Links resume into contact or pastes it into notes

Attaches reference letters and job orders to any contact too.

- Designed for recruiters to quickly enter names and addresses of candidates into their contact manager - save on retyping
- Enables recruiters to quickly retrieve resume and related documents from GoldMine® - resulting in higher productivity
- Checks for duplicates - Alerts if duplicate record exists
- Handy floating toolbar improves recruiter productivity
- Saves Web pages in HTML format
- Option to save as link the existing path of the resume and save space

Sales Lead Capture Tools & Recruiter Tools! For GoldMine

The quickest way to capture names & addresses into GoldMine!

AddressGrabber automatically extracts contact information from any block of text and creates a GoldMine record – saving you lots of hassle. With a single click it creates GoldMine contacts from addresses in web pages, email signatures, documents, web directories like yellowpages.com and many more. Also lets you transfer GoldMine contacts to shipping and accounting packages!

Here is how easy it is to transfer a contact:

1. Highlight an address
2. Click on the destination application icon on the AddressGrabber toolbar

AddressGrabber figures out which information belongs to which field in your address book and transfers the contact information field by field.

Automate your data entry process, save time and avoid retyping errors.

AddressGrabber Editions:

Deluxe: Captures contact information from web pages, emails, documents into GoldMine and lets you share your GoldMine contacts with 20-plus applications.

Business: Also lets you transfer contact information from GoldMine to shipping (FedEx, UPS Ship) and accounting packages (QuickBooks, Peachtree, MYOB).

The quickest way to capture leads from any list of contacts into GoldMine!

ListGrabber automatically extracts contact information from scanned lists, web pages, online directories, other documents and creates a GoldMine record for each contact. Addresses can be in any format. It is simply the most efficient lead-capturing tool that exists! Why waste time waiting for all the contacts to be typed in - ListGrabber lets you start selling your products and services within minutes.

Here is how it works:

1. Paste or open an address list in the edit box
 2. Click Parse button to extract the address fields into the ListGrabber grid after making appropriate settings
 3. Select destination application - GoldMine - and click on the Transfer button.
- Use in marketing campaigns - Process hundreds or even thousands of addresses in just one click!
 - Great for transferring addresses in text files, word documents, scanned documents – Exhibitor lists, conference attendees, membership lists
 - Prospecting on the web site, online directories – grab hold of those addresses and transfer them Into GoldMine® effortlessly
