

eharvest (n) - an online ordering, processing, agency reporting, and inventory tracking system

- **Reduce** the amount of time needed to process orders
- **Improve** inventory turns by moving food through your system quicker
- **Notify** member agencies with accurate product information
- **Eliminate** waste
- **Ensure** flexible pickup and delivery scheduling for agencies
- **Synchronization** with all online orders and your accounting programs
- **Prevent** food bank errors for out-of-stock item orders
- **Generate** service and monitoring reports
- **Interface** with your accounting software using OESync

“It’s marvelous. I no longer have to sit by the phone for a Second Harvest representative to call me back with what is available. I go online, place my orders, and it’s done immediately. It’s simple, easy and efficient...and I am thrilled with it!”

-Margaret Smith, Saint Luke’s Food Pantry, member agency of Second Harvest of Nashville

What is eharvest?

- **Easy to use** - for you and your member agencies
- **Online** - your inventory is all in one place and accurate up to the second
- **Customizable** - including USDA, regulatory needs and member restrictions

Look what eharvest did for Second Harvest of Nashville

- **Reduced** turnaround time of food from 7 days to 24 hours
- **Minimized** the man power needed to fulfill orders to one person
- **Improved** communication of available inventory with member agencies

Give eharvest a try!

- **Log on** to www.scsi-usa.com/eharvest
- **Type in** agency name: 999 / password: demo
- **Browse!**

“It’s had a dramatic effect not only on cost-savings for the food bank, but also more importantly, it’s greatly improved our inventory turnover so that the food is moving quickly through our system.”

-Ed O’Kelley, IT Director at Second Harvest of Nashville

No more apologizing for not having an item.

Features & Benefits:

- complete online ordering
- real-time inventory control
- allows member agencies to access only the inventory that is available to them based on USDA and other regulatory restrictions
- designed for “pull” inventories, in which member agencies choose from a number of delivery options and schedule the delivery online
- interfaces with accounting packages like **Exact Macola**. This interface synchronizes information from your accounting system and eharvest, eliminating the need to hand key orders and inventory
- pick ticket allows quantities to be up-to-date by pulling from the live data
- purchase order integrates seamlessly with eharvest and automatically updates inventory upon receipt of goods
- fully customizable Monthly Service Reports, which holds member agencies accountable for their orders

Proven Success & Results:

“This system is a blessing...our most often repeated and hated phrase in order entry was: ‘I am sorry, we are out of that item.’ Our most lovable new phrase in order entry is: ‘Have you tried any of this product? I think it will work well for your agency.’”

-Ed O’Kelley, IT Director of Second Harvest of Nashville

User Requirements:

Windows 98 and Internet Explorer 5.0 (minimum)

About SCSi Business Solutions:

- SCSi donated thousands of hours of programming talent to Second Harvest of Nashville to develop eharvest.
- SCSi is now working with many food banks around the country, making eharvest the industry standard for order processing and inventory tracking.
- “Our goal is to get enough food banks on eharvest that if we have a disaster, the food banks will be able to get on a centralized website and see a food bank in Kansas City with green beans and one in Boston with diapers. Then they could contact those food banks for the necessary products”
- Don Reeves, Jr., President of SCSi.
- SCSi, headquartered in Columbia, TN, is a full-service technology provider in the IT industry, certified with Exact Macola, FrontRange and Microsoft to name a few.

Other services SCSi can provide to Food Banks include web design and hosting and **Macola** support, training, and implementation.
